

Summary of Revisions to Alternative 3B

Alternative 3B has been revised since the DEIS to respond to public comments and minimize impacts to the community.

- Substantial change in overall horizontal alignment
 - Horizontal and vertical alignment of the tunnel shifted as a result of alignment revisions in south portal area
 - Alignment in north portal area has not changed
 - Revised alignment in south portal area to be closer to existing tracks and therefore reduce impacts
- Narrowed track spacing in south portal area
- Decrease in surface right-of-way required for the Project from 17.1 acres to 12.0 acres
- Decrease in surface parcels impacted from 100 to 88
- Decrease in residential building displacements from 46 to 22 (avoided displacements are historic resources)
- Avoids the need to demolish one of the historic Atlas Storage Company buildings
