

# Waiting Period

FRA will impose a waiting period for at least 30 days before releasing its final decision in a Record of Decision (ROD). A public review period for the FEIS began on November 25, 2016.

# Next Steps

## Record of Decision

A ROD will conclude the environmental study and document the final project decisions. The ROD must be completed before the Project can be advanced to design and construction. In the ROD, FRA will identify the engineering and environmental factors that were balanced to make a Project decision, and present final mitigation commitments. The ROD is scheduled for Spring 2017.

## Project Funding

Currently the Project is not funded. Should funding become available after the ROD, Amtrak will continue advancement of the project and community engagement.
